CHAL-0841-60

Copy 1 of 9

7 January 1960

ACTIVITY PROGRAM

1. PURPOSE: To provide eight additional Mark III Hand Controls for CHALICE assigned aircraft. This will standardize in-use items and afford an added capability for rear vision not presently existent in Mark I Hand Controls.

25X1A 2. Discussion: The [redacted] has requested that Baird-Atomic Corporation go into production for twenty-five hand controls for a firm fixed price of $838.00 each. In order to take advantage of this, it is recommended that Project CHALICE place a requirement at this time. Present assets consist of five
25X1A items at [redacted] The procurement of eight additional Controls would afford two Depot spares, one spare for each overseas detach-
25X1A ment and four each for installation in Articles at [redacted] Those presently in our inventory do not provide for "pipe line" and necessitate frequent removal and installation. There are signs of deterioration caused by excessive handling and transporting.

3. Expected Additional or Related Work or Services: This installation requires no modification to assigned aircraft and no component spares will be necessary with one complete spare item in the FAK. This procurement action was not programmed in the FY60 Budget and additional funds will be required in the amount indicated in paragraph 4 below.

4. Total Cost (Fixed Price): 8 Hand Controls at $838.00 each = $6,704.00

5. Delivery Schedule and Period of Performance: Deliveries will commence within eight weeks from time of approval to proceed and will be completed within fourteen weeks.
